A. CLASSIFICATION   OF SUBJECT MATTER
G06F9/5G   G06F9/48

According to International Patent Classification (IPC) or to both national classification and IPC

B FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal   , I NSPEC

C DOCUMENTS CONSIDERED   TO BE RELEVANT

Category *	Citation of document, with indication where appropriate, of the relevant passages	Relevant to claim No
	$^-$/ - -	

X	Further documents are listed in the continuation of box C		X	Patent family members are listed in annex

* Special categories of cited documents

'A ' document defining the general state of the art which is not considered to be of particular relevance

'E' earlier document but published on or after the international filing date

'L' document which may throw doubts on priority cla㎡m(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

'O' document referring to an oral disclosure, use, exhibition or other means

'P' document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X* document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

'Y* document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such docu㎡ ments, such combination being obvious to a person skilled in the art

& document member of the same patent family

INTERNATIONAL SEARCH REPORT

International application No
PCT/IB2005/050038

| Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet) |

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons

1 ☐ Claims Nos
   because they relate to subject matter not required to be searched by this Authority, namely

2 ☐ Claims Nos
   because they relate to parts of the International Application that do not comply with the prescribed requirements to such
   an extent that no meaningful International Search can be carried out, specifically

3 ☐ Claims Nos
   because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6 4(a)

| Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet) |

This International Searching Authority found multiple inventions in this international application, as follows

   see additional sheet

1 ☐ As all required additional search fees were timely paid by the applicant, this international Search Report covers all
   searchable claims

2 ☐ As all searchable claims could be searched without effort justifying an additional fee this Authority did not invite payment
   of any additional fee

3 ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report
   covers only those claims for which fees were paid, specifically claims Nos

4 ☒ No required additional search fees were timely paid by the applicant Consequently, this International Search Report is
   restricted to the invention first mentioned in the claims, it is covered by claims Nos

   1-13, 18-26

Remark on Protest   ☐ The additional search fees were accompanied by the applicants protest

                             ☐ No protest accompanied the payment of additional search fees

Form PCT/ISA/210 (continuation of first sheet (2)) (January 2004)

FURTHER INFORMATION CONTINUED FROM   PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-13, 18-26

    Methods and computer program product for scheduling tasks on a multi -processor system (with shared memory) based on memory usage. Switch to scheduling scheme based on co-operative multitasking, where preemption points are specified in each task, typically at points in task with low memory usage.

    ---

2. claims: 14-17

    Devices for evaluating whether multi -processor system (with shared memory) has enough memory to process the offered load and subsequent selection and suspension of memory intensive tasks in reaction to memory bottleneck situation.
